

Stefan Diskic

Front End Developer

Short developer career story: My programming career begins in high school where I first encountered programming. In particular, it was the c language that served as a springboard for c# that I did for 2 years of high school and 1 year on IT Academy. I worked with wtf, windows forms, universal applications and a little bit asp.net with Microsoft SQL database. Later on IT Academy, I got into touch with web technologies: HTML, CSS, JavaScript, PHP and I immediately fell in love with. After completing the software developer course on IT Academy I start to doing more and more web especially frontend and dive deeper into the JavaScript world... ☺ ☐
